

Model: ICARUS **Protection Class:** S1P SRC ESD
Article: RN20046 **EU Regulations:** EN ISO 20345:2011

DESCRIPTION

Icarus are low cut and comfortable safety shoes characterised by the use of innovative materials that enhance their characteristics and by the Made in Italy design.

S1P safety shoes with breathable nylon and suede microfibre upper with polyurethane reinforcement scuff cap. The soft white calfskin lining extends from the toes to the heel, providing comfort and well-being by wrapping around the foot like a sock.

The Infinergy® system guarantees an energy return of more than 55% at every step, and is ideal for those who do dynamic work. Anti-slip and anti-static properties for added safety and stability.

Icarus provides maximum safety to the toes and the forefoot thanks to the AirToe Aluminium toe cap while the metal-free Save & Flex PLUS anti-puncture system ensures full protection of the entire sole of the foot as it is stitched directly to the upper.

Safety shoes in standard protection S1P SRC ESD equipped with U-Power Original anatomical insole in soft, breathable and antibacterial leather.
